

Turn Turnings Into \$\$\$\$

- DO YOU CREATE CHIPS of Aluminum, Copper, Brass, Steel, Iron, or Swarf?
- DO YOU FACE EPA issues?
- DO YOU SELL IT TO scrap dealers?
- DO YOU WANT TO REMELT your scrap?
- DO YOU KNOW what you get paid for scrap?
- DOES YOUR SCRAP use needed floor space?

DO YOU WANT TO MAKE MONEY OR LOSE MONEY?

See more of the benefits below and at www.metalbrik.com

Ask for a free compression analysis of your chips

- **Remove potentially hazardous metal working fluid for recycling:** The MetalBrik System will remove hazardous metal working fluids from metal chips and turnings for reuse or disposal. Thousands of gallons normally lost on metal chips can be recycled.
- **Reduce chip specific labor costs:** MetalBrik will reduce the labor associated with handling the metal chips by eliminating transporting, storing, tracking of the metal chips and cleanup of the chip holding area.
- **Eliminate EPA & State Hazardous Waste Handling Issues:** MetalBrik eliminates handling requirements under EPA hazardous waste and used oil regulations. Compressed Briks are up to 99.5% fluid-free.
- **Comply with ISO 14001 Guidelines:** Using the MetalBrik system will allow your company to comply with ISO 14001 Environmental Management Standards for "zero discharge" with scrap and metal working fluid waste.
- **Increase Scrap Value of Metal Chips:** Use of the MetalBrik system will increase the total value of your metal chips. Briks can be sold to scrap dealers, foundries, or remelters as recyclable material.
- **Save Plant Space & Reduce volume of metal:** Compression of metal chips into Briks will reduce the total volume of metal up to 20:1 and reduces amount of floor space needed to store scrap.

MetalBrik units can be used alone or in conjunction with other processing equipment
